Module 5 Ouiz

P(X) = 10X - (10 - X)5 = 10X - 50 + 5X

random variable, with X taking values $\{0,1,\ldots,10\}$, find the expected profit.

E(p) = E(15x - 50) = 15E(x) - 50= 15.5 - 50 = 25

(Correct

P(X < 12) = Pexp(12, 0.1)

Correct

 $P(X<12)^3 = P(XP(12,0.1)) =$

| | y=1 | y = 4 | y = 16 | 1/1 point |
|------------------------|--------------------------|-------------------------------|-----------------------|-----------|
| x=1 | 0.20 | 0.25 | 0.05 | 10.5 |
| x=5 | 0.10 | 0.15 | 0.25 | 10.5 |
| Brompt 2: Suppose that | y and V are candom varia | has with the joint probabilit | v mass function above | 10.0 |

0-3412

Correct

P(X=5, Y=1) +P(X=5, Y=4) 0.1+0.15=0.25

| | y=1 | y = 4 | y = 16 |
|-----|------|-------|--------|
| x=1 | 0.20 | 0.25 | 0.05 |
| x=5 | 0.10 | 0.15 | 0.25 |
| | _ | | |

Find P(X > Y)

| (21 | (x, Y) | = E(X)E(X) |
|------|---------|-------------|
| COV | | - E(X) E(Y) |

1/1 point 425.5-3×6.7 = 5.4

0.10 0.15

E(x)=1x0.5+5x0.5

= 3 E(Y) = 1x0.3+4x0.4+16x0.3

E(XL) = 1x1 x0.5+1x4x0.52+1x10x0.52

= 6.7 $\beta_{X,Y} = \frac{\text{CoV}(X,Y)}{G \times G Y}$

E(X2)=13x012+2x012

Find ρ , the correlation coefficient of X and Y. Round answer to four decimal places. $\sqrt{(X)} = E(X^2) - E(X)^2 = 13 - 9 = 4$ © correct $V(Y) = E(Y^2) - E(Y)^2 = 83.5 - 6.7^2 = 38.61$

= 83.5

 x=1
 0.20
 0.25

 0.15
 0.25

Are X and Y independent? (Answer "Yes", "No", or "Can't determine")

No

Correct

(6U(X,Y)=5.4>0 Not independent

 $f(x) = \frac{\lambda^k}{k!} \cdot e^{-\lambda}$
